

Bunded Spill Containment Flooring

Our bunded flooring range is the flexible decking solution for creating liquid handling workstations and storage areas to fit your working environment. Available in three sizes, each unit can be used as a standalone workstation or combined to create multiple work floor configurations. Each individual unit is compliant with current oil storage regulatory requirements.

The low 150mm design and polyramp option allows easy access for loading and unloading. An optional joint strip cover can be added for a superior finish and optional connectors to link unit sumps.
