

Spill Trays

Manufactured from 100% polyethylene, our spill tray range is the ideal solution for catching spills in the work area and handling small drums and cans. They are compact and lightweight and can fit into small areas. Spill Trays are strong and compatible with most liquids. With sump capacities up to 145 litres, available in a range of sizes and colours. Our Spill Tray range provide a practical, simple and safe solution for small liquid storage, handling and spillage needs.
